Projects

Coder Foundry (Full Stack .NET Web Development)

- Created [Bug Tracker](#), a multitenant ticket tracking system using ASP.NET Core MVC and PostgreSQL. Enables companies to track projects and the lifecycle of the trouble tickets within. Implemented user and role-based security to establish separation of duties.
- Created a [Blog](#) platform using ASP.NET Core MVC and PostgreSQL. Implemented a role-based security system, file upload, search, and email service. Database interaction is done through LINQ to Entity Framework.
- Created [Movie Pro](#), an API-based application that allows users to input and import movie posters and details including cast and crew information.
- Created [Portfolio](#), a static site to showcase my abilities as a developer using HTML, JavaScript, CSS, and Bootstrap.

Work Experience

Copywriter for Software

Freelance SaaS and Technology Copywriter
